Data Pamphlets

A Valuable Resource for Market Analysts, Researchers, and Planners

Regional Market Analysis – economic and demographic data help marketing professionals and market researchers to analyze the makeup of the economy, including income and employment growth, population changes, households, and retail sales potential.

Research and Reference – historical and projected data in one printed volume enable researchers to assess economic and demographic trends quickly; many different data sets in one source make it a valuable reference tool for libraries.

Long Range Planning – annual projections to 2040 aid planners in performing studies and preparing analyses.

Customized Presentation of Data – with the purchase of data tables on CD-ROM and using your own software, you can tabulate data and graph trends.

How the Projections are Made

Woods & Poole county projections are updated annually and utilize county models that take into account specific local conditions based on historical data from 1969 to 2007 (1969 to 2008 for population); all data from 2008 to 2040 (2009 to 2040 for population) is projected. One key aspect of Woods & Poole projections is that the economies of counties are linked together: projected economic conditions in one county are reflected in the projected economic conditions in other counties. County population growth is a function of both projected natural increase and migration due to economic conditions. Although not an indicator of future accuracy, the average absolute percent error for Woods & Poole's 10-year total population projections has been $\pm 8.4\%$ for counties and $\pm 4.2\%$ for states.

Available on CD-ROM

Data Pamphlets are available on CD-ROM in spreadsheet files for use in Access or EXCEL or any other spreadsheet program on PCs or on Macintosh computers. These computer readable files make it easier for the user to analyze the data, prepare special tables, and create graphs and charts. All years of data, from 1969 to 2040, for all variables are included in the CD-ROM files.

Woods & Poole Economics, Inc. is an independent firm that specializes in long-term county economic and demographic projections. Woods & Poole's database for every county in the U.S. contains projections through 2040 for more than 900 variables. Woods & Poole has been making county projections since 1983.
